

Appendix A

North Carolina Wetlands Summary

North Carolina Wetlands Summary

“The land ethic simply enlarges the boundaries of the community to include soils, waters, plants, and animals, or collectively: the land.”—Aldo Leopold

North Carolina Wetlands Overview

Wetlands are part of that community of which Leopold describes in which water plays a crucial role. A wetland is a geological formation that describes an area that is often wet but may not be wet all the time. According to a North Carolina State University publication, Protecting your wetlands, Wetlands are covered by shallow water part of year and have soils indicative of wet conditions and contain plants that are specially adapted to wet conditions. Wetlands are more than marshes and swamps and bogs. They are found in every county in North Carolina, with wetlands occurring from the coast to mountains, they can be found in wide flat areas, in depressions and between water and dry land such as along streams, rivers, lakes and estuaries. (NC State University Cooperative Extension Service. “Protecting Your Wetlands”)

Wetlands of North Carolina

Type	Description	Plants associated
Salt/Brackish Marsh	Any salt marsh or Marsh subject to flooding either regular or occasionally by tides including wind tides.	Cordgrasses, salt and sea grasses, bulrush, sea lavender, needlerush and glasswort
Estuarine Shrub/Scrub	Any shrub dominated community subject to flooding either regular or occasionally by tides including wind tides.	Wax myrtle, eastern red cedar
Estuarine Forest	A forested wetland community subject to flooding either regular or occasionally by tides including wind tides.	Pine dominated with rushes
Maritime Forest	A forested community with its growth stunted due to the stresses of nearby salt spray from the ocean.	Live oak, red maple, swamp tupelo
Freshwater Marsh	Grassy areas flooded for extended periods during the growing season, included are marshes associated with lakes, managed impoundments, some Carolina Bays and non-tidal marshes.	Sedges, millets, arrowhead, pickerelweed, arrow arum smartweed, giant cane
Pocosin	Marshy shrub communities that typically occur in saturated, acid, nutrient poor, sandy or peaty soils; at some distance from large streams; and may be subject to periodic burning.	Evergreen shrubs
Bottomland Hardwood	Riverine forested or occasionally shrub communities in seasonally floodplains.	Oaks, sweet gums, green ash, river birch, cottonwoods

Type	Description	Plants associated
Swamp Forest	Very poorly drained riverine or non-riverine forested or occasionally shrubs communities that are semi-permanently flooded, including temporarily flooded depressional systems.	Cypress, black gum, water tupelo, green ash
Headwater Swamp	Wooded riverine systems along small streams. Soils are moist most of the year. Channels receive their water overland flow and rarely overflow their banks.	Hardwood dominated communities
Hardwood Flat	Poorly drained interstream flats not associated with rivers or estuaries; they are seasonally saturated by high water table or poor drainage.	Generally include Sweet gum and red maple
Pine Flat	Pine communities located in seasonally saturated soils that might become dry for part of the year. They generally occur in nearly flat areas not associated with a river or stream system,	Loblolly Pine

Wetlands serve an important function as biological filters that remove sediments and pollutants from surface waters. They also serve as a natural sponges reducing flooding by slowing discharging excess water back into streams or groundwater table. Wetlands are biologically rich and often contain a greater diversity of plants and animals that is found in drier habitats. They are excellent habitat for many kinds of waterfowl, shorebirds, and songbirds and are important as amphibian and fish spawning and rearing areas.

In addition, wetlands provide recreational opportunities more detail on recreational outlets will be discussed later in this appendix. Now suffice to say that a majority of Americans enjoy hiking, hunting, fishing, bird watching or photographing nature and wildlife. These activities would be greatly diminished if it were not for wetlands.

Historically, natural wetlands dominated floodplains and river deltas, and most level land in the coastal plain. From the time colonization began in of our state, North Carolina had 7.2 million acres of wetlands. Since that time, wetlands have been drained for agriculture, forestry, flood control, road construction and urban development. (US Department of Interior) Now about half of the remaining acreage that was once wetlands still exists. According to the most recent figures available, about 5.1 million acres of North Carolina –close to 17 percent of the state –is still wetland. The coastal plain contains 95 percent of the state’s wetlands. (US Geological Survey. National Water Summary on Wetland Resources)

Wetland Status and Trends

“Wetlands are important to our nation’s heritage, economy and wildlife –especially when it comes to coastal communities, when a study shows that area four times the size of Miami is disappearing every year, it underscores the importance of strengthening our collective efforts to improve wetland management, to reduce losses and to ensure costal infrastructure and resources are protected.”— Sally Jewell, U.S. Secretary of the Interior

Most of North Carolina's wetlands are located in coastal watersheds, it goes without saying that the loss of coastal wetlands that Secretary Jewell refers to also includes wetland loss in North Carolina. *Status and Trends of Wetlands in the Coastal Watersheds of the Conterminous United States 2004-2009*, a report produced by U.S. Department of the Interior, Fish and Wildlife Service and National Oceanic and Atmospheric Administration, National Marine Fisheries Service examined wetland losses on the Pacific, Atlantic and Gulf of Mexico coasts and along the Great Lakes. It determined that an estimated 80,000 acres of coastal wetlands are being lost on average each year, up from 60,000 acres lost a year during the previous study.

The report goes on to say, the Atlantic coast region experienced a net loss of wetlands between the years 2004-2009 at roughly about 112,000 acres. The report attributes much of the loss and degradation of wetlands in coastal watersheds to population pressures and conversion of wetlands to urban or silvicultural uses. This assault on wetlands is likely to continue as population continues to increase in coastal watersheds with an estimate that one quarter of the land area under the nation's coastal watersheds will be developed by 2015 (Dahl 2013). This development will further degrade wetlands by changes in water flow, increased pollution and habitat fragmentation.

Wetland Types which should Receive Priority for Acquisition

Criteria developed in the late 1980s and early 1990's by U.S. Department of Interior under the National Wetland Conservation Plan are still relevant today. Broadly stated the plan's criterion for developing priority system for acquiring wetland acreage should be based on three goals.

Consideration for acquisition of wetlands should be those wetland types that are:

- Rare or have declined rapidly within the state,
- Subject to loss or degradation by an identifiable threat, or
- Sites with diverse and important functions and values.

Under these broad goals of wetland protection, the Fish and Wildlife Service has provided more details to what types of wetlands should be acquired through the National Coastal Wetlands Conservation Grant Program FY 2015 grant guidelines. The guidelines give eleven attributes for which a wetland acquisition for conservation and protection should include. The table below lists these qualities.

Criteria for Determining Priority for Acquisition of Wetlands

Benefit	Acquisition Criteria
Wetlands conservation	Will the acquisition reverse coastal wetland loss or habitat degradation in decreasing or stable coastal wetland types?
Maritime forests on coastal barriers	Will the acquisition significantly benefit maritime forests on coastal barriers?

Benefit	Acquisition Criteria
Long-term conservation	Will the acquisition ensure long-term (at least 20 years) conservation of coastal wetland functions?
Coastal watershed management	Will the completed acquisition help accomplish the natural resource goals and objectives of one or more formal, ongoing coastal watershed management plan or effort?
Conservation of threatened and endangered species	Will the acquisition benefit any federally listed endangered or threatened species, species proposed for Federal listing, recently delisted species or designated or proposed critical habitat in coastal wetlands? Will it benefit State-listed species?
Benefits to fish	Will the acquisition provide, restore or enhance important fisheries habitat?
Benefits to coastal-dependent or migratory birds	Will the acquisition provide, restore, or enhance important habitat for coastal-dependent or migratory birds?
Prevent or reduce contamination	Will the acquisition prevent or reduce input of contaminants to the coastal wetlands and associated coastal waters that are already contaminated?
Catalyst for future conservation	Will the project leverage other ongoing coastal wetlands conservation efforts in an area or provide additional impetus for conservation?
Partners in conservation	Will the acquisition receive financial support, including in-kind match, from private, local or other Federal interests?
Education/outreach program or wildlife-oriented recreation	Is the project designed to increase environmental awareness and develop support for coastal wetlands conservation? Does it provide recreational opportunities that are consistent with the conservation goals of the site?

Tools to Manage Wetlands

The North Carolina Wetland Conservation Plan is a strategy for the state to achieve no net loss and other wetland management goals by integrating both regulatory and non-regulatory approaches to protecting wetlands. North Carolina Division of Water Resources (NC DWR) with assistance for US EPA Wetland Program Development Grant crafted the plan. The plan addresses North Carolina's wetland program development plans for the next five years (2014-2018) and incorporate all four core

elements of the Environmental Protection Agency's (EPA) Wetlands Program Framework (Monitoring and Assessment, Voluntary Restoration and Protection, Regulation, and Water Quality standards for wetlands). Below is a summary of the plan along with additional efforts going towards wetlands management.

Monitoring and Assessment

NC DWR wetland monitoring and assessment work in North Carolina has monitored wetlands for over nine years and has collected state wide wetland data at 184 sites from 2004-2013 of which could be categorized into ten types of wetlands. The data collected includes GIS/land use analysis, rapid assessments, water quality, soils, hydrology, and biological surveys of vegetation, amphibians, and macroinvertebrates.

NC DWR also worked with the state's in Lieu fee program, NC Ecosystem Enhancement Program (NC EEP), mitigation bankers and others involved in designing, developing and managing mitigation projects to gather data about wetlands. For compensatory mitigation projects, monitoring and assessment reports are submitted on an annual basis for a minimum of five to seven years NC EEP utilizes a watershed –based planning process, while working with state and federal agencies, private companies and land trust to obtain the best possible return from their restoration, enhancement and protection projects. NC EEP has been monitoring the progress and success of its more than 580 projects aimed at conserving, restoring or enhancing around 30,000 acres of wetlands since the late 1990's. Also, North Carolina participated in the EPA's National Wetland Condition Assessment wetland survey in 2011 and is working collaboratively with South Carolina, Georgia and Alabama to apply a regional emphasis to wetland monitoring.

Voluntary Restoration and Protection

Voluntary restoration and protection can help maintain, increase and or improve the amount and function and or condition of the state's wetlands. Voluntary restoration and protection in North Carolina is encouraged and implemented on federal, state, local, and public-private partnership levels. At the federal level agencies like the United States Department of Agriculture (USDA), Fish and Wildlife Service (USFW), Army Corps of Engineers (USACE) work to provide opportunities for voluntary restoration and protection of wetlands. The USDA's Natural Resources Conservation Services (NRCS) Wetland Reserve Program is one such program. The program enrolls landowners to receive incentives for restoring, enhancing and protecting wetlands. Passed by Congress in 1989, the North American Wetlands Conservation Act (NAWCA) is an incentive-based, landowner-friendly program that fosters the development of public-private partnerships to protect North America's migratory bird habitat.

At the state level there are several state programs which provide opportunities for individuals or groups to aid in the state's goals of wetland restoration and protection. Some of the ways involve donation of land or placement of a parcel of land under and easement or contract, as with the Wildlife Resources Commission (WRC), Wildlife Conservation Program, Division of Coastal Management (DCM) the NC Conservation Tax credit Program, NC Division of Soil and Water Conservation and Clean Water Management Trust Fund. While other programs focus on focus on planning efforts. Two such efforts are Division of Coastal Management (DCM) Wetland Conservation Plan and WRC *Conservation Recommendations for Priority Terrestrial Wildlife Species and Habitats in North Carolina*.

The Division of Coastal Management identified the need for a wetlands conservation plan in 1992, when it found that the state could not determine the amount, type, location, and loss/gain trends of freshwater wetlands in the 20 coastal counties. To address these weaknesses, DCM developed a Wetlands Conservation Plan for the coastal area. The primary purpose of the plan is to provide detailed wetlands information to local, state, and federal governments, businesses, non-profit organizations and the public so they can make better resource management decisions.

The plan contains these major elements

- A wetlands inventory
- Functional assessment
- Wetland restoration
- Agency coordination
- Coastal area wetland policies
- Local land-use planning

Conservation Recommendations for Priority Terrestrial Wildlife Species and Habitats in North Carolina answers the question “How much habitat is enough for at-risk species in North Carolina?” This 2014 non-regulatory document’s purpose is to present guidelines which will allow conservation, land use and land management decisions to take place while effectively protecting and enhancing the wildlife resources of the state. The document devotes a whole section to wetland habitats. Topics include planning and development recommendations for all wetlands habitats, demarking core terrestrial habitat zones, and managing adjacent landscapes. Also, attention is given to the proper care of specific wetlands such as ephemeral pools, and bog habitats.

Numerous advocacy groups such as The Nature Conservancy, North Carolina Coastal Federation, various land trusts, Ducks Unlimited etc. strive to protect and restore water resources throughout the state. Various groups are often able to obtain and or sometimes provide funding sources for conserving and protecting these important ecosystems. For example, recently, Ducks Unlimited a non-profit organization, dedicated to conserving North America’s continually disappearing waterfowl habitats, announced in July 2014, that through collaborative efforts with state and federal agencies, other non-profit organizations and private landowners more than 106,000 acres of vital wetland habitat has been conserved in North Carolina.

Regulations

“...No discharge of dredged or fill material shall be permitted unless appropriate and practicable steps have been taken which will minimize potential adverse impacts of the discharge on the aquatic ecosystem.” Section 404(b)(1) the Clean Water Act

- Section 404 of the Clean Water Act:

In accordance with Section 404 of the Clean Water Act, the United States Army Corps of Engineers (USACE) is responsible for regulation the discharge of dredge or fill material into waters of the United States, including open waters, streams, and wetlands. The purpose of the Clean Water Act is to restore and maintain the physical, chemical, and biological integrity of the nation’s waters. Under Section 10 of the Rivers and Harbors Act and this program USACE is responsible for receiving and

evaluating permit applications affecting waters of the United States. Frequently, the required public interest review of applications results in a finding that the public must be compensated for unavoidable aquatic losses, including wetland resources.

- **401 Water Quality Certification Program:**

NC Division of Water Resources of NC DENR currently administers a comprehensive wetlands regulatory program. Section 401 of the Clean Water Act stipulates that no Federal permit, including 404 permits will be issued unless a 401 Water Quality Certification has been issued or waived. 401 Certifications are required for any federally permitted or licensed activity that may result in a discharge to or filling of streams, wetlands, or open waters. DWR requires applicants to document measures taken to avoid and minimize impacts to these resources during design of the project and to perform compensatory mitigation and verify that a given project authorized by a federal permit will not contravene the state water quality standards.

- **Coastal Zone Management Act:**

North Carolina Division of Coastal Management (DCM) assesses coastal wetlands under North Carolina's Coastal Area Management Program in response to passage of the federal Coastal Zone Management Act of 1972 (CZMA). DCM works to protect, conserve and manage North Carolina's coastal resources through an integrated program of planning, education and research. As well as being subject to the 404 rules for development, development projects within one of North Carolina's twenty coastal counties must also acquire a Coastal Area Management Act (CAMA) permit.

- **North Carolina Wetland Compensatory Mitigation:**

Permitted impacts are projects that affect the nation's aquatic resources, which include rivers, and wetlands in North Carolina. Before property owners may proceed with work that may impact the function and quality of surface waters, a permit from the US Army Corps of Engineers (USACE) is often required to meet the requirements of the Clean Water Act or the Rivers and Harbors Act. Through the regulatory program, the Corps of Engineers ensures that all associated adverse environmental impacts from work in waters or wetlands are avoided or minimized. In some cases, the Corps may require compensatory mitigation to offset losses of aquatic resource usually at a minimum of 1:1 ratio. Compensatory mitigation is the restoration, establishment, enhancement, or preservation of aquatic resources for the purpose of offsetting losses of aquatic resources resulting from activities authorized by Corps of Engineers' permits.

Types of Compensatory Mitigation	
Restoration	Returns natural or historic functions to a former or degraded aquatic environment
Establishment	Alters an upland site to develop an aquatic resource
Enhancement	Improves the functioning of an existing aquatic resource
Preservation	Protects and maintains an existing aquatic resource through real estate protections or other conservation actions

Sources of Compensatory Mitigation	
Mitigation bank	One or more sites where aquatic resources such as wetlands or streams are restored, established, enhanced and / or preserved for the purpose of providing compensatory mitigation in advance of authorized impacts to similar resources.
In-lieu fee program	A program that involves the compensatory mitigation of aquatic and related terrestrial resources through funds paid to a government or non-governmental natural resource management organization. In NC, the Ecosystem Enhancement Program (NC EEP) a state Department of Environment and Natural Resources (NC DENR) initiative offers four In-Lieu Fee mitigation programs designed to assist private and public entities comply with state and federal compensatory mitigation for streams, wetlands, riparian buffers, and nutrients.
Permittee-responsible mitigation	Individual projects constructed by permittees to provide compensatory mitigation for activities authorized by Corps of Engineers' permits

Wetland losses and gains through mitigation are tracked by three basic wetlands types with a fourth headwater wetland pending criteria development from NC Division of Water Resources. The three types are coastal, riparian, and non-riparian. Mitigation success criteria are also based on those three basic types. The present criteria indicate a success rate of 70-90% for mitigation projects in Eastern North Carolina.

Standards and Classification

- **Water Quality Standards**

North Carolina's water quality standards for wetlands were implemented in 1996. The wetland standards contained in North Carolina Administrative Code 15A 02B.0231 and in 15A 02B.0201 are narrative in nature and were designed to protect through anti-degradation, preserve, restore and enhance the quality and use of wetlands and other waters of the state that are influenced by wetlands. Wetland uses protected in the rule include the following.

- Storm and flood water storage/retention,
- Hydrological functions such as groundwater discharge and ground water recharge,
- Filtration/storage of pollutants,
- Shoreline protection,
- Habitat for the propagation of wetland-dependent aquatic organisms and other wildlife.

These above uses are maintained and or enhanced through standards contain in the administrative code and provide NC DWR with the basic regulatory structure needed to protect wetlands from various detrimental activities outside of USACE jurisdiction such as ditching and draining. NC

DWR has also utilized these standards to require some mining operations to maintain natural hydrology of surrounding wetlands that may be affected by groundwater pumping.

- **Wetland Classifications:**

In North Carolina all wetlands are classified as either freshwater wetlands or saltwater wetlands pursuant to North Carolina Administrative Code. The saltwater wetlands are defined to coincide with estuarine wetlands that are regulated by DCM. North Carolina also has a subclass Unique Wetlands which includes “wetlands of exceptional state or national ecological significance” and requires special additional regulatory protection to maintain existing uses.

Public Recreational Opportunities found in North Carolina Wetlands

Federal Agencies

Wetlands make ideal places for people to experience passive outdoor recreation. Hiking, birding, wildlife viewing, photography, canoeing, camping and other activities can all be enjoyed in a wetland.

U.S. Fish & Wildlife Service, National Wildlife Refuge Systems exist primarily to safeguard wildlife populations through habitat preservation and, as such, offer prime opportunity to view or photograph birds and other wildlife. Other recreational opportunities vary, as do development and accessibility.

National Wildlife Refuges located in North Carolina

Refuge	Recreational Aspects
Alligator River	Available for automobile touring, boating, fishing, hunting. Features two half-mile wheelchair-accessible nature trails: the Sandy Ridge Wildlife Trail, which is adjacent to 15 miles of paddle trails on Milltail Creek; and the Creef Cut Wildlife Trail, which also has a wheelchair-accessible fishing dock at its trailhead. Refuge Wildlife Drive offers opportunities to view a wide variety of birds, as well as black bears and red wolves.
Cedar Island	Available for boating, saltwater fishing, waterfowl hunting. The refuge is mainly a coastal marsh of 11,000 acres; there are two boat ramps. Concentrations of diving ducks, sea ducks, American black ducks, black rails, wading birds and shorebirds. Refuge is approximately 40 miles northeast of Beaufort via U.S. 70 and N.C. 12 at the confluence of Pamlico and Core sounds in Carteret County.
Great Dismal Swamp	Most of the refuge's 111,000 acres of forested wetlands are in Virginia but a portion extends into Camden, Pasquotank and Gates counties in North Carolina west of U.S. 17. The refuge is available for biking, boating, fishing and hiking, as well as bird and wildlife watching Lake Drummond, a 3,100 acre natural lake in Virginia, is at the heart of the swamp. The southern reaches of the refuge are adjacent to North Carolina's Dismal Swamp State Park.

Refuge	Recreational Aspects
Mackay Island	Available for bicycling, boating, fishing, hiking, hunting. Features a Charles Kuralt Trail observation site, an elevated platform with spotting scopes for views of the Great Marsh, plus seven miles of dikes suitable for walking or cycling. During fall and winter, tundra swans, ducks and large concentrations of snow geese congregate in the ponds south of the Great Marsh. Mackay Island is a portion of Knotts Island, which is accessible via private boat or free ferry at Currituck County Courthouse on N.C. 168 or via Princess Anne Road south from Pungo, Virginia. The refuge's Open Roads Days allow the public to drive the roads normally closed to vehicular traffic around the refuge impoundments at the end of Mackay Island Road.
Mattamuskeet	Available for automobile touring, boating, fishing, hiking, hunting. Lake Mattamuskeet (40,000 acres) is North Carolina's largest natural lake. The refuge has significant wintering populations of ducks, Canada geese, snow geese and tundra swans. Concentrations of bald eagles and other raptors, wading birds and shorebirds occur seasonally. Features 3-mile entrance road and 5-mile drive along lake, and miles of grassed dikes criss-crossing the refuge. There are several observation decks and two state boat ramps. Recent plans to renovate the lakeside Mattamuskeet Lodge as a lodge, meeting site and museum fell through when money ran out. The refuge is 9 miles east of Swan Quarter by U.S. 264 and N.C. 94 in Hyde County.
Pea Island	Available for boating, fishing, hiking. Features a visitor center, two wheelchair-accessible trails with an observation tower on one and an overlook on the other, a photography blind and 13 miles of beach. Concentrations of ducks, geese, swans, wading birds, shore birds, raptors, neotropical migrants are seasonally abundant on the refuge. On N.C. 12 north of Rodanthe on Hatteras Island in Dare County.
Pee Dee	Available for automobile touring, fishing, hiking, hunting. Habitat for more than 180 bird species, including wading birds, migratory waterfowl and songbirds Enter the refuge 7 miles north of Wadesboro on U.S. 52 in Anson County.
Pocosin Lakes	Available for automobile touring, fishing, hiking, and deer and small game hunting. Features three-quarter-mile Scuppernong River Interpretive Boardwalk, the Walter B. Jones Sr. Center for the Sounds interpretive visitors center, and observation and photography opportunities for tundra swans, snow geese and ducks, as well as black bear and other birds and animals. The visitor center is adjacent to the Tyrrell County Visitor Center on U.S. 64 in Columbia.

Refuge	Recreational Aspects
Roanoke River	Available for fishing, hiking, hunting. Concentrations of wintering waterfowl, nesting ducks, raptors, osprey and neo-tropical migrants are common. The largest inland heron rookery in North Carolina is on the refuge. Bald eagles nest on adjacent lands; river corridor is wintering area for bald eagles. The refuge consists of five tracts of land along 70 miles of the Roanoke River and two distant satellite tracts in other river basins.
Swanquarter	Available for motorized boating, saltwater fishing, waterfowl hunting. Concentrations of diving ducks, sea ducks, American black ducks, wading birds and shorebirds. The refuge supports one of the northernmost populations of the American alligator. There are four boat ramps (one accessible only via a trail), and a fishing pier at Bell Island. Refuge land on the north shore of Pamlico Sound east and west of the village of Swan Quarter is only accessible by boat, except for trails in the Bell Island Unit (2 miles west of Swan Quarter by U.S. 264) in Hyde County.
Proposed Mountain Bogs National Wildlife Refuge	The U.S. Fish and Wildlife Service proposes to protect Southern Appalachian Mountain bogs, one of the nation's rarest and most imperiled plant and wildlife habitats, through the creation of the Mountain Bogs National Wildlife Refuge. The proposed refuge would eventually include up to 23,478 acres scattered across as many as 30 sites in Alleghany, Ashe, Avery, Clay, Graham, Henderson, Jackson, Macon, Transylvania, Wilkes, and Watauga counties, North Carolina; and Carter and Johnson counties, Tennessee.

United States Department of Agriculture

The Croatan National Forest's 160,000 acres have pine forests, saltwater estuaries, bogs and raised swamps called pocosins. Bordered on three sides by tidal rivers and the Bogue Sound, the forest is defined by water. A variety of recreational experiences are found in the Croatan National Forest such as hunting/fishing, camping, hiking, horseback riding, picnicking and biking. Moreover, visitors can enjoy the forest's wide diversity of wildlife- from deer, black bears and turkeys to wading birds, ospreys and alligators. Canoeing and boating are popular on blackwater creeks and saltwater marshes. The Croatan is also home to the carnivorous Venus fly-trap, sundew and pitcher plant.

National Park Service

Cape Lookout National Seashore is a low, narrow, ribbon of sand running from Ocracoke Inlet on the northeast to Beaufort Inlet on the southwest. These barrier islands-56 miles long-consist mostly of wide, bare beaches with low dunes covered by scattered grasses, flat grasslands bordered by dense vegetation, and large expanses of salt marsh alongside the sound. Lying closest to the sound--the body of water between a barrier island and the mainland--the salt marsh is one of the most diverse

ecosystems on an island. Many visitors come to view wildlife and can find many species of birds in the marsh feeding on the insects, fish, crabs, and other invertebrates that live there.

Cape Hatteras National Seashore, the nation's first national seashore, was established to preserve significant segments of unspoiled barrier islands along North Carolina's stretch of the Atlantic Coast. A large portion of the park is considered a salt marsh where visitors can hike, view wildlife, kayak, crab or fish. The park also allows limited waterfowl hunting.

State Agencies

North Carolina State Parks System has several parks where wetland features are a recreational component of the park. These parks include Dismal Swamp, Goose Creek, Hammock Beach, Lake Waccamaw State, Merchants Mill Pond and Pettigrew state parks (see table below).

North Carolina State Parks with Wetland Features

State Park Unit	Wetland Features / Recreational Features
Dismal Swamp State Park	<p>The Great Dismal Swamp is one of the largest protected swamp wildernesses in the eastern United States, with 38,000 acres in North Carolina and 82,000 acres in Virginia. The state park, which officially opened in March 2008, has a visitors center, a system of boardwalks, decks and gazebos, 16.7 miles of hiking and mountain biking trails, and bird watching and paddling opportunities.</p> <p>The park is adjacent to the Great Dismal Swamp National Wildlife Refuge. In December 2013, the largest known forested wetlands restoration project east of the Mississippi River was constructed in the park restoring hydrology to 9,580 acres.</p> <p>Funded by a North American Wetlands Conservation Act grant, the project restores habitat for over 200 species of migratory birds, helps to control wildfires, and sequesters mercury and atmospheric carbon.</p>

State Park Unit	Wetland Features / Recreational Features
Carolina Beach State Park	<p>Three limesink ponds, each vegetated by a unique plant community, are found in the park. Cypress Pond, the most unusual limesink pond in the park, is dominated by a dwarf cypress swamp forest. Lily Pond is occupied by the broad, oval leaves and water lilies, which cover its waters in early summer.</p> <p>Grass Pond, which dries out almost every year, is filled with a variety of aquatic sedges. Carnivorous plants thrive in the boggy soil around its edge and in the park's acidic, mineral-poor soil. The park offers boating, camping, education events, exhibits and educational facilities, fishing, hiking, and picnicking.</p>
Goose Creek State Park	<p>This tranquil juncture of the broad, lazy Goose Creek and the Pamlico River is guarded by giant, old oaks draped with Spanish moss. The park offers boating, camping, education events, exhibits and educational facilities, fishing, hiking, picnicking and swimming.</p>
Hammocks Beach State Park	<p>Bear Island, an 892-acre barrier island has one of the most unspoiled beaches on the Atlantic coast and is accessible only by passenger ferry or private boat. Huggins Island, located just east of Bear Island in the mouth of Bogue Inlet, is a 225-acre island with a maritime swamp forest.</p> <p>The 17-acre Jones Island became a part of the park in October 2007 and is managed as a state natural area. The park offers boating, camping, education and events, fishing, picnicking and swimming. The park also has a kayak, canoe and paddleboard rental concession</p>
Haw River State Park	<p>Located near the headwaters of the Haw River, Haw River State Park and the Summit Environmental Education Center are situated among piedmont forest, fields, wetlands and uplands on 1,374 acres in Guilford and Rockingham counties. The Summit is a retreat and conference center located on 210 acres in the park. The conference center includes eight meeting spaces, motel and dormitory-style sleeping facilities, indoor and outdoor common areas, a swimming pool, a six-acre lake, trails and a buffet-style dining room.</p>
Lake Waccamaw State Park	<p>One of the Carolina bays, Lake Waccamaw has species of animals found nowhere else on the planet, rare plants and endangered animals. The park offers camping, education and events, fishing, hiking, and picnicking.</p>

State Park Unit	Wetland Features / Recreational Features
Merchants Mill Pond State Park	Coastal pond and Southern swamp forest mingle to create one of North Carolina's rarest ecological communities - an "enchanted forest," with primitive species of fish, towering bald cypress trees with massive trunks and luxuriant growths of Spanish moss. The park offers camping, canoeing and canoe rentals, education and events, fishing (including small craft with trolling motors), hiking and picnicking. Many areas and activities are accessible to those with disabilities.
Pettigrew State Park	More than 1,200 acres of land and 16,600 acres of water on Lake Phelps blend nature, history and recreation. The park offers bird watching, boating, camping, education and events, fishing, hiking and picnicking. Native American dugout canoes found locally and on display are among the longest and oldest known. In December 2005, the state announced the addition of more than 2,500 acres along the Scuppernong River, including about four miles of river-front land, to Pettigrew. Its potential future use includes camping, canoeing, hiking, fishing, picnicking and wildlife viewing.

The state parks system also manages state natural areas, some that protect wetland-type habitats.

Theodore Roosevelt Natural Area, a 265 acre nature preserve adjacent to the North Carolina Aquarium at Pine Knoll Shores, includes a self-guiding nature trail showcasing the barrier island ecosystem, containing maritime forest and marsh habitats. The marine habitat is a rich area for shellfish and abundant birdlife. Located along the northern shores of the Chowan River, in Gates County is the **Chowan Swamp Natural Area**. **Bushy Lake State Natural Area**, located in Cumberland County and managed by Jones Lake State Park, protects an area over 6300 acres of wet pocosin and carolina bay forest. **Pineola Bog, Beech Creek Bog and Sugar Mountain Bog** are three state natural areas which protect almost 300 acres of bog habitat in the western mountains of North Carolina.

North Carolina Wildlife Resources Commission Game Lands

Hunters of North Carolina are provided with more than two million acres of game land to which to hunt on that is managed by the North Carolina Wildlife Resources Commission (WRC). Of that acreage, almost 500,000 acres spread over 44 preserves are located within the coastal plain and almost all of that land is considered wetlands. Equally abundant are the numerous boat launches located also in the coastal plain and are also managed by WRC which provide boat and canoe/kayak access to numerous bodies of water.

Open to the Public Non-Government Agency

The Nature Conservancy

Located in Columbus and Brunswick Counties **Green Swamp Preserve** contains some of the country's finest examples of longleaf pine savannas. The open savannas have a diverse herb layer

with many orchids and insectivorous plants. Almost 13,000 acres of the preserve are comprised of pocosin (shrub bog). Federal Paper Board donated 13,850 acres of this preserve to The Nature Conservancy in 1977 and an additional 2,577 acres in the late 1980s. The Nature Conservancy has since purchased additional land in the preserve. The Green Swamp contains at least 14 different species of insectivorous plants, including: extensive populations of Venus flytrap, sundew, and four species of pitcher plant. The preserve is also home to many rare animals, including: American alligator, fox squirrel, Henslow's sparrow, Bachman's sparrow, and Hessel's hairstreak butterfly. Visitors can hike, photograph wildlife and bird watch.

The Boiling Spring Lakes Preserve, 5000+ acres is owned by the State of North Carolina under North Carolina Department of Agriculture & Consumer Services – Plant Conservation Program and managed by The Nature Conservancy. The preserve located in Brunswick County ranks highest in the state in rare plant species (112). Many of those are found in the preserve. Boiling Springs Lake wetland complex contains a fascinating cross section of the Cape Fear region's natural communities. A series of parallel ridges and swales are the remnants of an ancient dune system. A large concentration of Carolina bays (elliptical wetland depressions) studs the landscape. Fire-dependent natural communities, including high and low pocosins (evergreen shrub bogs) and longleaf pine savannas on the ridges and bay rims, form an intricate mosaic of habitat. Many opportunities exist for hiking, birding, and identifying wildflowers and rare plants.

Local Governments

Many local governments and municipalities in North Carolina have constructed multi-use trails in wetlands while expanding their greenway systems. For example the City of Cary has completed restoration of the aquatic and riparian ecosystems along the White Oak Creek Greenway. Furthermore, the town is looking at a total of seven (7) sites, located adjacent to Town greenway trails which are being proposed for restoration and/or stabilization.

The City of Raleigh, Walnut Creek Wetland Center is where visitors can explore the 58 acres of wetlands in downtown Raleigh. The Walnut Creek Wetland Center opened in 2009 to foster awareness of the importance of wetlands, wildlife habitat, hydrology, and human interaction with nature. McAlpine Creek Park in Charlotte is host to a beaver created wetland inside the park, where visitors can view beaver, turtles, ducks, and herons. Over in Union County at Cain Creek Park trails take visitors through wetland areas for opportunities to see birds, reptiles and amphibians.

Other examples where cities or agencies, have created opportunities for recreation in wetland areas are the utilization of reconstructed wetlands for wastewater treatment. The City of Goldsboro constructed wetlands to “polish” the wastewater. Treated waste water enters the constructed wetlands contains around 3 mg/L total nitrogen. The resulting “polished” water has about 1 mg/L total nitrogen remaining in it prior to being discharged into the Neuse River. The wetland treats water year round, even in the winter when the plants are dormant, due to the microbial organisms in the soils and roots. The summertime is particularly beautiful in the constructed wetlands when visitors can enjoy the scenery. A large variety of flowering plants, such as the Blue Flag Iris, Fragrant Water Lily, Spatterdock, Pickerel Weed, and American Lotus fill the basins.

The recreational benefits of wetlands are also found at the North Carolina Zoological Park, near

Asheboro. A constructed stormwater wetland is different from a natural wetland in that it is designed to capture runoff from the streets, parking lots and rooftops and cleans it before entering a larger body of water. The Constructed Wetland is an exhibit designed to help educate visitors about the importance of wetlands to the environment and to serve as a filter system for rainwater runoff from the Zoo's North America parking lot.

And finally, the City of Boone Clawson –Burney Park contains a constructed wetland to treat stormwater runoff. In addition, it provides a unique ecosystem for lots of different species of plants, birds, amphibians, reptiles, insects, and mammals. Wetlands are important bird habitats because birds use them for breeding, nesting, rearing young, a source of drinking water, resting, and social interactions. Wetland vegetation also provides shelter from predators and from the weather. Lastly, this wetland park within the town is an area for the community to enjoy. The trail around the wetland provides a great view to observe what's going on in the wetland. The trail is ADA accessible so that all may enjoy the sounds and surroundings of nature.

Methodology

Public Input

Public Survey: The North Carolina Division of Parks and Recreation conducted a public input survey to evaluate demand for, participation in, and perceptions of outdoor recreation opportunities in the state. The survey was conducted online using Survey Monkey and was distributed via multiple channels during May 2014. A series of press releases across the state invited the public to complete the survey that was available on the division's webpage. In total, the NC SCORP Public Input Survey yielded 17,535 responses.

As a component of the SCORP, the intent of the public survey was to gather information that will provide the state with a framework to address the need for improved outdoor recreation for the next five years. Questions from the survey broadly address areas such as outdoor recreation participation, satisfaction with statewide outdoor recreation opportunities, motivation for participation, barriers to participation, attitudes about recreation provider's priorities.

Presentations

Informational sessions and requests for comments were conducted to stakeholders during the planning process. These included:

- 2014 North Carolina Municipal and County Park and Recreation Directors Annual Conference
- 2014 North Carolina Statewide Trails Conference
- 2014 North Carolina Recreation and Park Association Annual Conference
- 2014 North Carolina Association of County Commissioners Annual Conference (Information booth)
- 2014 North Carolina League of Municipalities Annual Conference (Information booth)

Public Review

The draft plan will be made available for public comment in early 2015 prior to adoption and submission to the National Park Service.

Inventory of Park Areas and Facilities

Population Growth and Density – The information about county population counts and estimates is taken from the North Carolina State Data Center's web page. The county population totals and projections for 2000, 2010, and 2020 and are for July of those years. The population densities and growth are also from the State Data Center web pages. The state rankings are calculated using the information provided.

Public Recreational Acreage and Facility Inventory –The data collection process for local governments began with the results of the inventory of local governments conducted for the

2009-2013 SCORP. The Division of Parks and Recreation used the results of the inventory over 400 county and municipal governments as the basis for the 2014 inventory.

A request via email in the Spring of 2014 was sent to all local governments in the state (over 550). A follow-up request was sent to non-respondents. Each local government was asked to update inventory records to reflect the current recreational acreage and facilities that they managed for public recreation. The request resulted in 246 updated records. A similar survey of local governments was conducted in 2009. In addition, records were added for local governments that did not respond to the survey but did have LWCF and PARTF projects that included either park acreage or recreation facilities. Combining information collected in 2014 with the inventory from 2009 and information from PARTF and LWCF projects, the inventory in this document includes information from 470 local governments in North Carolina.

For state and federal agencies, the Division of Parks and Recreation used the data layers containing property boundaries supplied by each agency to the state's geographic information system (GIS). The property information was compared to the county-boundary data layer to calculate the acreage by county for each agency.

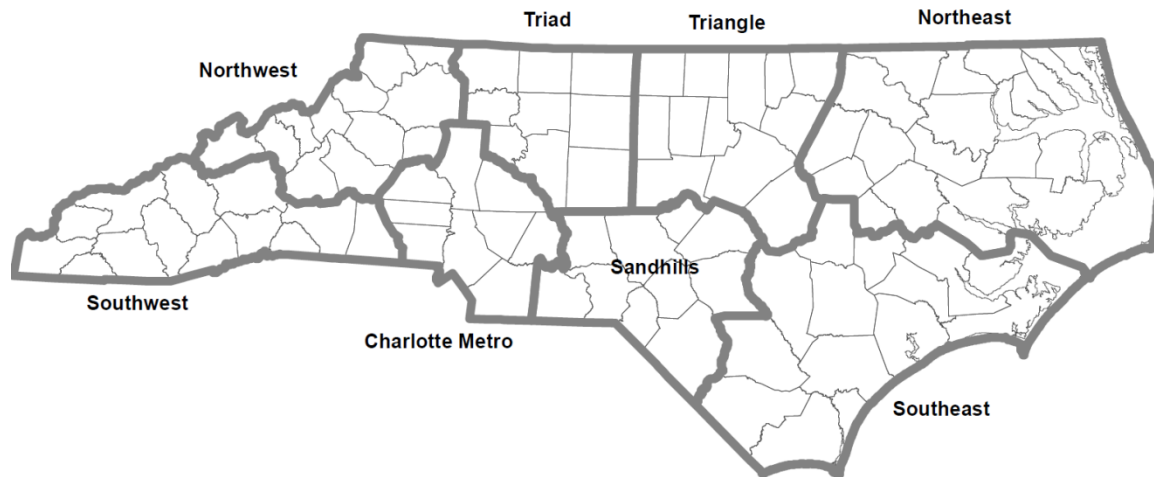

Geographic Regions

The eight regions used for analysis in the plan are displayed below. The regions were developed at the request of Parks and Recreation Authority to consider the geographic distribution of Park and Recreation Trust Fund grants across North Carolina. The regions were approved by the board in March 2012. The factors used in developing the regions included:

- Understandable areas that encompass the main population centers in the state: Charlotte Metro, Triad, and Triangle.
- A balance between having enough regions to consider geographic distribution, but not too many so that regions are difficult to compare. Some of the standard regions available used too few regions (Three – Mountains, Piedmont, Coastal) or too many regions (North Carolina's 16 planning regions).
- A balance between the population of a region and the number of counties in the region.
- As shown in the table, six of the eight regions encompass between nine and 14 counties. As for population, five of the eight regions have between 900,000 and 2.1 million people.
- The eight regions provide a reasonable division of the state. The state is divided into four regions in the northern half of the state and four regions in the southern half of the state.

Region	# of Counties	2010 Population
Northwest	12	487,760
Southwest	13	761,019
Triad	9	1,442,646

Charlotte Metro	9	2,104,755
Triangle	12	1,947,624
Sandhills	10	908,446
Northeast	21	792,357
Southeast	14	1,141,620
Total	100	9,586,227

Appendix C

Public Preference Survey

1. Why do you participate in outdoor recreation activities? (Check all that apply)

	Percentage Responding
Be outdoors	93%
Have fun	87%
Relaxation	78%
To be closer to nature	64%
To be with family and friends	63%
It is free and/or affordable	60%
Exercise or physical fitness	59%
Visit/see new places and things	57%
Solitude (to spend time by myself)	49%
Escape urban setting	43%
To learn	39%
For the challenge	28%

2. Please indicate which of the following activities you or members of your household participate in or have participated in the past 5 years.

	Percentage Responding
Visiting a beach or lake	69%
Walking for Pleasure or Exercise	61%
Visiting parks or Historical Sites	60%
Hiking, Trails	59%
Fishing - Freshwater, bank or pier	58%
Viewing scenery	52%
Fishing - Freshwater, boat	50%
Nature viewing	50%
Swimming, All types	50%
Gardening	49%
Hunting, Gun	47%
Shooting, Target Firing Range	46%
Boating - Power, Freshwater	46%
Canoeing, Kayaking	45%
Picnicking	45%
Fishing - Saltwater, on-shore or pier	45%
Camping, Developed site	44%
Fishing - Saltwater, boat	37%
Outdoor Fairs Festivals	37%
Driving for Pleasure	34%
Camping, Primitive	34%
Backpacking	33%

	Percentage Responding
Visiting Zoos	33%
Nature Photography	33%
Shooting , Skeet	31%
Bird Watching	31%
Boating - Power, Saltwater	31%
Open Space Park, Relaxing	30%
Archery	28%
Bicycling, On-road	28%
Jogging, Running for exercise (on and off-road)	26%
Hunting, Bow	26%
Golf, 18-hole, 9-hole, driving range	22%
Bicycling, BMX or Off-Road	22%
Playground Activities	22%
Tubing	22%
4WD, Other high-clearance vehicle	21%
Baseball, Softball	20%
Water Parks	18%
Golf, Miniature	18%
Spectator Activities	18%
Dog Parks	17%
Frisbee, Disc Golf, Kite Flying	16%
Quad or All Terrain Vehicle Driving	15%
Collecting (flowers, insects, rocks)	14%
Water skiing, Jet skiing	13%
Basketball, Outdoor	13%
SCUBA/Snorkeling	13%
Skiing, Down Hill	12%
Tennis	11%
Horseback Riding, Trails	11%
Horseback Riding, General	11%
Soccer	10%
Utility Terrain Vehicle, Mod. Golf Cart	9%
Splash Pool, Sprayground	9%
Volleyball, Badminton	9%
Football (playing)	8%
Rappelling, Rock Climbing	8%
Geocaching	7%
Surfing, All Types	7%
Motorized Trail Biking, Dirt Biking	7%
Orienteering	6%
Sailing, Saltwater	6%
Sailing, Freshwater	5%
Radio, Remote Control Models	5%
CrossFit Training	5%
Skiing, Cross Country, Snow Shoeing	5%
Skateboarding	4%

	Percentage Responding
Spelunking (Caves)	4%
Rollerskating	3%
Other (please specify)	3%
Rollerblading, Inline skating	3%
Swimming (Competitive)	3%
Ice Skating, outside	3%
Triathlon	3%
Shuffleboard	2%
Lacrosse	2%
Windsurfing, Kitesurfing	1%
Rugby	1%
Cricket	0.3%

3. Where have you participated in outdoor activities in the past twelve months? (Check all that apply).

	Percentage Responding
State parks, forests, or state historic sites	83%
Local parks (i.e. city or county)	76%
National Forests, National Parks or federal lands	67%
Quasi-public or private (i.e. YMCA, Boys and Girls Clubs, country clubs)	20%

4. How many times have you or any member of your household visited a local, state or national park, historic site, or forest in the last twelve months?

	Percentage Responding
Local parks/sites - More than 8 times	35%
Local parks/sites - 3-5 times	20%
Local parks/sites - 1-2 times	17%
Local parks/sites - 6-8 times	12%
Local parks/sites - None	4%
State parks/sites - 3-5 times	28%
State parks/sites - More than 8 times	22%
State parks/sites - 1-2 times	22%
State parks/sites - 6-8 times	14%
State parks/sites - None	4%
National parks/sites - 1-2 times	29%
National parks/sites - 3-5 times	21%
National parks/sites - More than 8 times	14%

National parks/sites - None	10%
National parks/sites - 6-8 times	8%

5. In the past twelve months, do you think that you or any member of your household visited local, state and/or national parks, historic sites or forests...

	Percentage Responding
Local parks/sites - More frequently?	26%
Local parks/sites - Less frequently?	12%
Local parks/sites - With the same frequency?	47%
State parks/sites - More frequently?	23%
State parks/sites - Less frequently?	15%
State parks/sites - With the same frequency?	50%
National parks/sites - More frequently?	17%
National parks/sites - Less frequently?	20%
National parks/sites - With the same frequency?	47%

6. During the past twelve months, what proportion of your trips to participate in outdoor activities at local, state and/or national parks were overnight versus day trips?

	Percentage Responding
Local parks/sites - 0%	62%
Local parks/sites - 10%	9%
Local parks/sites - 25%	5%
Local parks/sites - 50%	5%
Local parks/sites - 75%	3%
Local parks/sites - 100%	2%
State parks/sites - 0%	37%
State parks/sites - 10%	17%
State parks/sites - 25%	13%
State parks/sites - 50%	11%
State parks/sites - 75%	6%
State parks/sites - 100%	6%
National parks/sites - 0%	34%
National parks/sites - 10%	13%
National parks/sites - 25%	9%
National parks/sites - 50%	10%
National parks/sites - 75%	7%
National parks/sites - 100%	13%

7. During the past twelve months, when spending the night away from home to participate in outdoor recreation, what accommodations did you use? (Check all that apply).

	Percentage Responding
Friend or relative's home	24%
Tent camping	34%
RV camping	16%
Vacation rental	26%
Hotel/motel	47%
Cabin/yurt	15%
Bed and breakfast	8%
I did not stay overnight	13%

8. When visiting local, state and/or national parks what is your average travel time from your home?

	Percentage Responding
Local parks/sites - Under 30 minutes	50%
Local parks/sites - 30 minutes to 1 hour	23%
Local parks/sites - 1 to 2 hours	8%
Local parks/sites - 2 to 5 hours	4%
Local parks/sites - More than 5 hours	1%
State parks/sites - Under 30 minutes	9%
State parks/sites - 30 minutes to 1 hour	26%
State parks/sites - 1 to 2 hours	29%
State parks/sites - 2 to 5 hours	19%
State parks/sites - More than 5 hours	4%
National parks/sites - Under 30 minutes	4%
National parks/sites - 30 minutes to 1 hour	8%
National parks/sites - 1 to 2 hours	16%
National parks/sites - 2 to 5 hours	35%
National parks/sites - More than 5 hours	18%

9. How important to you and your household is the availability of...

	Percentage Responding
Local parks/sites - Not at all important	2%
Local parks/sites - Somewhat important	22%
Local parks/sites - Extremely important	66%
State parks/sites - Not at all important	1%
State parks/sites - Somewhat important	19%
State parks/sites - Extremely important	72%
National parks/sites - Not at all important	3%

National parks/sites - Somewhat important	22%
National parks/sites - Extremely important	66%

10. Please tell us how well you think the following are currently meeting your household's needs.

	Percentage Responding
Local parks/sites - Not at all meeting needs	6%
Local parks/sites - Somewhat meeting needs	51%
Local parks/sites - Completely meeting needs	33%
State parks/sites - Not at all meeting needs	4%
State parks/sites - Somewhat meeting needs	51%
State parks/sites - Completely meeting needs	36%
National parks/sites - Not at all meeting needs	6%
National parks/sites - Somewhat meeting needs	46%
National parks/sites - Completely meeting needs	36%

11. Please rate the importance of access to trails connecting to outdoor recreation opportunities for local, state and national parks in North Carolina. These would include separate non-motorized active transportation trails to outdoor recreation sites.

	Percentage Responding
Trail access in local parks/sites - Not at all important	8%
Trail access in local parks/sites - Somewhat important	32%
Trail access in local parks/sites - Extremely Important	49%
Trail access in state parks/sites - Not at all important	6%
Trail access in state parks/sites - Somewhat important	30%
Trail access in state parks/sites - Extremely Important	55%
Trail access in national parks/sites - Not at all important	7%
Trail access in national parks/sites - Somewhat important	28%
Trail access in national parks/sites - Extremely Important	53%

12. How important to you is WiFi availability while you are participating in outdoor recreation activities...

	Percentage Responding
At local parks/sites? - Not at all important	55%
At local parks/sites? - Somewhat important	27%
At local parks/sites? - Extremely Important	9%
At state parks/sites? - Not at all important	55%

At state parks/sites? - Somewhat important	29%
At state parks/sites? - Extremely Important	9%
At national parks/sites? - Not at all important	54%
At national parks/sites? - Somewhat important	27%
At national parks/sites? - Extremely Important	9%

13. Please rate your satisfaction with outdoor recreation in North Carolina in the following areas:

	Percentage Responding
Efforts to purchase land for preservation and recreation - Not at all satisfied	11%
Efforts to purchase land for preservation and recreation - Somewhat satisfied	58%
Efforts to purchase land for preservation and recreation - Extremely satisfied	16%
Providing outdoor recreation opportunities - Not at all satisfied	6%
Providing outdoor recreation opportunities - Somewhat satisfied	54%
Providing outdoor recreation opportunities - Extremely satisfied	27%
Providing adequate environmental education opportunities - Not at all satisfied	7%
Providing adequate environmental education opportunities - Somewhat satisfied	55%
Providing adequate environmental education opportunities - Extremely satisfied	23%
Management of public land and water resources - Not at all satisfied	13%
Management of public land and water resources - Somewhat satisfied	53%
Management of public land and water resources - Extremely satisfied	20%
Do you have any comments you would like to offer regarding the question above?	18%

14. Please rate your satisfaction with the amount of public access to natural bodies of water near your home:

	Percentage Responding
- Not at all satisfied	11%
- Somewhat satisfied	49%
- Extremely satisfied	28%

15. Which of the following word phrases indicates what emphasis you would like to see outdoor recreation providers in North Carolina pursue?

	Percentage Responding
Emphasis on natural resource preservation/protection	12%
Emphasis on providing outdoor recreation in natural settings	16%
Equal balance between preservation/protection and outdoor recreation	61%

16. Outdoor recreation providers often need to prioritize their efforts. Please rank the following priorities in order of importance from 1 (highest) to 6 (lowest). Start by selecting your top ranked (highest) priority and select the number 1 from the drop-down. Choose your second priority, and select the number 2, etc.

	Percentage Responding
Acquisition of new parks and open space - 1	24%
Acquisition of new parks and open space - 2	16%
Acquisition of new parks and open space - 3	12%
Acquisition of new parks and open space - 4	11%
Acquisition of new parks and open space - 5	10%
Acquisition of new parks and open space - 6	14%
Development of new facilities at existing recreation sites - 1	11%
Development of new facilities at existing recreation sites - 2	21%
Development of new facilities at existing recreation sites - 3	19%
Development of new facilities at existing recreation sites - 4	16%
Development of new facilities at existing recreation sites - 5	13%
Development of new facilities at existing recreation sites - 6	7%
Operation and maintenance of existing infrastructure and facilities - 1	31%
Operation and maintenance of existing infrastructure and facilities - 2	20%
Operation and maintenance of existing infrastructure and facilities - 3	19%
Operation and maintenance of existing infrastructure and facilities - 4	11%
Operation and maintenance of existing infrastructure and facilities - 5	5%
Operation and maintenance of existing infrastructure and facilities - 6	2%
Transforming existing facilities to serve new purposes - 1	4%
Transforming existing facilities to serve new purposes - 2	9%
Transforming existing facilities to serve new purposes - 3	14%
Transforming existing facilities to serve new purposes - 4	23%

	Percentage Responding
Transforming existing facilities to serve new purposes - 5	20%
Transforming existing facilities to serve new purposes - 6	17%
Providing local, regional, and statewide trails - 1	13%
Providing local, regional, and statewide trails - 2	14%
Providing local, regional, and statewide trails - 3	12%
Providing local, regional, and statewide trails - 4	13%
Providing local, regional, and statewide trails - 5	24%
Providing local, regional, and statewide trails - 6	11%

Providing educational programs and visitor services - 2	7%
Providing educational programs and visitor services - 3	11%
Providing educational programs and visitor services - 4	14%
Providing educational programs and visitor services - 5	16%
Providing educational programs and visitor services - 6	36%

17. What are the greatest barriers to you/your family participating more frequently in outdoor activities, if any? (Check all that apply).

	Percentage Responding
Physical or health limitation	15%
Cost	21%
Lack of time	59%
Participate in other recreational activities or hobbies that are not outdoor	8%
Lack of available facilities	23%
Quality or condition of facilities	13%
Safety concerns	7%
Lack of interest	2%

18. How important is it to you that your local government, state government, and the federal government spend public funds to acquire land to develop outdoor recreation areas in North Carolina?

	Percentage Responding
Local - Not at all important	9%
Local - Somewhat important	35%
Local - Extremely important	43%
State - Not at all important	6%
State - Somewhat important	31%
State - Extremely important	51%

Federal - Not at all important	10%
Federal - Somewhat important	30%
Federal - Extremely important	47%

19. Which of the following would you support as an alternative source of funding for land acquisition and/or development of outdoor recreational areas and/or facilities? (Check all that apply).

	Percentage Responding
Park entry fees	34%
Commercial user fees	40%
User fees (e.g. permits)	36%
Taxes	28%
Donations	61%
Concessions and sales	55%
Dedicated funding source	43%
None	3%

Appendix D

Recreation Provider Survey

1. What type of governmental entity do you represent?

	Percentage Responding
City/town	33%
County	16%
State	36%
Federal	6%
Quasi-Public/Nonprofit	9%

2. Do you have a system-wide master plan/comprehensive plan for your parks and outdoor recreation sites, facilities and services?

	Percentage Responding
Yes	74%
No	12%

3. Rate the usefulness of your system-wide masterplan/comprehensive plan for your park/park system.

	Percentage Responding
Prioritizing overall needs for your park system - Not useful	2%
Prioritizing overall needs for your park system - Somewhat useful	16%
Prioritizing overall needs for your park system - Useful	59%
Prioritizing overall needs for your park system - N/A	10%
Prioritizing decisions related to providing high quality recreation experiences in your park system - Not useful	2%
Prioritizing decisions related to providing high quality recreation experiences in your park system - Somewhat useful	22%
Prioritizing decisions related to providing high quality recreation experiences in your park system - Useful	51%
Prioritizing decisions related to providing high quality recreation experiences in your park system - N/A	12%
Prioritizing development of recreation facilities in your park system - Not useful	3%
Prioritizing development of recreation facilities in your park system - Somewhat useful	16%
Prioritizing development of recreation facilities in your park	56%

system - Useful	
Prioritizing development of recreation facilities in your park system - N/A	11%
Prioritizing acquisition of land for your park system - Not useful	3%
Prioritizing acquisition of land for your park system - Somewhat useful	22%

4. Rate the level of difficulty in obtaining funds for your park/park system across the areas listed below.

	Percentage Responding
Obtaining new facility development funds - Difficult	48%
Obtaining new facility development funds - Somewhat difficult	33%
Obtaining new facility development funds - Not difficult	2%
Obtaining new facility development funds - N/A	2%
Obtaining major renovation funds - Difficult	45%
Obtaining major renovation funds - Somewhat difficult	33%
Obtaining major renovation funds - Not difficult	4%
Obtaining major renovation funds - N/A	3%
Obtaining land acquisition funds - Difficult	51%
Obtaining land acquisition funds - Somewhat difficult	21%
Obtaining land acquisition funds - Not difficult	4%
Obtaining land acquisition funds - N/A	10%
Obtaining facility replacement funds - Difficult	44%
Obtaining facility replacement funds - Somewhat difficult	31%
Obtaining facility replacement funds - Not difficult	4%
Obtaining facility replacement funds - N/A	7%
Obtaining outdoor recreation and education programming funds - Difficult	28%
Obtaining outdoor recreation and education programming funds - Somewhat difficult	32%
Obtaining outdoor recreation and education programming funds - Not difficult	18%
Obtaining outdoor recreation and education programming funds - N/A	6%
Obtaining inclusive recreation facility and programming funds - Difficult	31%
Obtaining inclusive recreation facility and programming funds - Somewhat difficult	30%
Obtaining inclusive recreation facility and programming funds - Not difficult	13%
Obtaining inclusive recreation facility and programming funds -	10%

N/A	
Obtaining overall administration funds - Difficult	22%
Obtaining overall administration funds - Somewhat difficult	36%
Obtaining overall administration funds - Not difficult	25%
Obtaining overall administration funds - N/A	3%
Obtaining daily maintenance funds - Difficult	16%
Obtaining daily maintenance funds - Somewhat difficult	39%
Obtaining daily maintenance funds - Not difficult	27%
Obtaining daily maintenance funds - N/A	3%

5. Rate the level of difficulty related to MEETING PUBLIC NEEDS in your park system.

	Percentage Responding
Meeting demand for a growing population - Difficult	31%
Meeting demand for a growing population - Somewhat difficult	41%
Meeting demand for a growing population - Not difficult	12%
Meeting demand for a growing population - N/A	2%
Meeting the need for undeveloped public lands - Difficult	31%

Open Project Selection Process

NORTH CAROLINA'S OPEN PROJECT SELECTION PROCESS (OPSP)

Introduction

The State of North Carolina offers federal Land and Water Conservation Fund (LWCF) assistance for land acquisition and the development/renovation of outdoor recreational facilities through an open and competitive grant process known as the Open Project Selection Process (OPSP). Information on North Carolina's OPSP is provided for the benefit of the general public and potential local and state applicants. On behalf of the North Carolina Department of Environment and Natural Resources (DENR), the Division of Parks and Recreation (DPR) administer the LWCF grant program for the state.

The LWCF State Side Assistance Program was established by the LWCF Act of 1965 (Section 6, as amended; Public Law 88-578; U.S.C. 4601-4 et seq.) to stimulate a nationwide action program to assist in preserving, developing, and assuring all citizens of the United States, in present and future generations, such quality and quantity of outdoor recreation resources as may be available and are necessary and desirable for individual active participation.

A requirement for States to maintain their eligibility to receive LWCF monies is the completion of an approved Statewide Comprehensive Outdoor Recreation Plan (SCORP) and the OPSP once every five years. North Carolina's OPSP was developed in accordance with the National Park Service (NPS) requirements cited in the OPSP chapter of the LWCF Federal Financial Assistance Manual, October 1, 2008.

The state's annual LWCF apportionment is used as 50:50 matching grants for eligible state park projects and/or for eligible local government projects. Eligible local applicants include counties, towns, cities, villages and public authorities with legal authority to provide public recreation. Federally recognized Native American tribes also are eligible as a local government.

The administration of North Carolina's program, including the selection criteria and rating process is the focus of this document. The rating system was developed to process state and local acquisition and development projects to ensure that the selection of competing projects for funding is fair and equitable.

The current OPSP consists of the following seven components required by the National Park Service (NPS). These components are identified and explained in the following sections:

- 1) Priority Rating Systems,
- 2) Project Selection Process,
- 3) Recurring Funding Cycle,
- 4) Public Notification,
- 5) Program Technical Assistance,
- 6) Public Participation, and
- 7) Funding Distribution

Priority Rating System

North Carolina's priority rating system is based on a point system which is used to rank projects according to specified criteria. The criteria are used to evaluate the project need, applicant compliance

history, site and project quality and alignment with the current SCORP goals.

The state has two OPSP priority rating systems: one for local projects and one for state park projects.

Project Selection Process

Submitted applications (local and state parks) will be scored using published scoring criteria. The scoring criteria favor a project's direct linkage to identified SCORP goals and initiatives. Additional scoring categories for local projects will include, but are not limited to: the provision of new and/or renovated outdoor recreation facilities, local planning efforts, public participation at the project sponsor level, needy local applicants, site consideration, clientele served, accessibility of the proposed project, ability of the sponsor to operate and maintain the project after development and/or acquisition and previous grant administration compliance.

The total score awarded to each local and/or state park project will determine rankings. Projects with the highest total scores that fall within the available LWCF funds will be recommended for funding first. If the last project on the list can only be partially funded, the SLO will ask the project sponsor(s) if they are willing to increase their percentage of project match to complete the project as proposed within the available funds. If the project sponsor does not wish to reduce their project's LWCF amount, then the project is removed from the lists of projects recommended for funding that year. The project ranked next on the list shall be selected and subjected to the same process. The process will be repeated until a project is found for which the available funds can be used. All projects that are not funded may reapply the next time that local projects are eligible for funding consideration.

Recurring Funding Cycle

North Carolina's LWCF Grants Program is administered on an annual cycle.

Public Notification

The funding cycle begins each year upon when the Secretary of the Interior issues the notice of apportionment to the governor. This notification identifies the amount of funds which will be made available to North Carolina for the LWCF grant program. Upon notification, DPR solicits applications for proposed projects from political subdivisions across the state, including Native American tribal governments, and state parks through email notification and on the Division's website.

The Division maintains a comprehensive mailing and email list of all potentially eligible applicants. This list includes names and addresses of political subdivisions and parks and recreation directors throughout the state who have jurisdictional responsibility for recreation, or who may have a related interest in public recreational development. Included on this list are the names of special interest groups, professional and community organizations, and others who have expressed an interest in the LWCF program.

Anyone interested in the LWCF program in North Carolina may find the information posted on the Division of Parks and Recreation's website. The announcements include the application schedule, deadline, and anticipated date of notification of approved or selected projects. The application and other required documents as well as program information can be assessed and downloaded from DPR's

website. A hard copy can be requested as well.

The following funding schedule dates are approximate for projects. The schedule was developed based on the assumption that the state will be notified of its annual apportionment by March of each year. If notification is received later, the schedule may be delayed accordingly.

August 1 – Public notification of the grant cycle.

January 31 – Deadline for the submission of current federal fiscal year applications to DPR.

February/March – Applications are reviewed, evaluated and rated per the state's LWCF Priority Rating System. The Recreation Resources Service (RRS) at North Carolina State University conducts pre-award inspections of each project site. On behalf of DPR, RRS provides field administration for the LWCF and NC Parks and Recreation Trust Fund (PARTF) programs. DPR's grant staff and RRS consultants rate all applications and submit the ranked listing to the State Liaison Officer (SLO) and Alternate State Liaison Officer (ASLO) for funding consideration.

August 15 – State Liaison Officer's recommended projects are submitted to Southeast Regional Office of NPS for review, approval and execution of project agreements. For local projects, DENR project agreements are initiated after NPS approval is attained.

This schedule allows the State to submit its selected projects to NPS in time for federal approval and obligation of funds prior to the end of the federal fiscal year, September 30.

Program Technical Assistance

DPR provides outreach and technical assistance to potential local LWCF applicants through regional RRS consultants and through DPR and RRS's websites. DPR and RRS makes every effort possible to answer questions regarding application procedures, the proper completion of an application, and the criteria used for project selection and grant awards. Site visits with the applicant will occur prior to the scoring and rating of projects to better understand the project and the site's environmental suitability for the proposed project.

DPR's grants staff will provide outreach and technical assistance to potential state park LWCF applicants as requested. Also, grant staff will conduct site visits with state park applicants prior to the scoring and rating of projects.

Public Participation

Federal guidelines require that the state's SCORP and OPSP include opportunities for public participation before implementation of the new program criteria. Public participation is required to assure that the preparation and revision of the selection process and rating systems are based on citizen involvement and public participation. In North Carolina, public involvement in determining the SCORP goals and the selection process was made in several ways.

Public participation throughout the SCORP planning process was instrumental in determining the major outdoor recreation issues which are a significant part of the selection process and rating system for state and local projects. All document/press releases were posted on DPR's website. In addition, two separate surveys (general public and recreation providers) were used to ensure public participation and input into the development of the state's SCORP goals and initiatives, and therefore, the associated scoring system's criteria. Several presentations were made at conferences throughout the process including the North Carolina Recreation and Park Association's annual conference, Municipal and County Recreation Director's Conference, and the first ever North Carolina State Trails Conference. Information about the LWCF program and SCORP was made available at the NC League of Municipalities and NC Association of County Commissioner's conferences.

Project Evaluation Criteria for Local Governments

State of North Carolina

Department of Environment and Natural Resources

February 2015

Scoring Summary

	Points Awarded by Type of Project		
Category	Acquiring Land	Developing Recreation Facilities	Both Land and Facilities
Planning	10	20	20
Public Involvement	15	15	15
Recreation Facilities	0	55	55
Site Considerations	5	5	5
Operation and Maintenance	15	15	15
Land Acquisition	15	0	15
Clientele Served	0	5	5
Past LWCF per Capita Funding	10	10	10
Consistency with the NC Outdoor Recreation Plan	20	50	50
Total Possible Points	90	175	190
Bonus: plus or minus 12 points for projects involving factors including partnerships, interconnected trail networks, access to public waters, as well as the quality of previous projects			

LWCF Scoring System for Local Grants

Please provide all of the information requested for each item. Attach a separate page if more space is needed to address any item. Before beginning, please refer to the Definitions Section (page 10-13). A team of LWCF staff and regional consultants will evaluate each application based on the scoring system and make the final decision about the applicant's score.

Applicant:
Project:

A. Planning: (20 possible points)

1. Master Plan for the park and/or greenway system (10 points)

(Not applicable for projects proposing land acquisition only)

- a. ☐ The applicant has a master plan created or revised within the past five years for the project site and the project conforms to the plan.

Date the plan was produced: _____ (9 points)

or

- b. ☐ The applicant has a master plan created or revised within the past six years to ten years for the project site and the project conforms to the plan.

Date the plan was produced: _____ (4 points)

- c. ☐ The local governing board has adopted the master plan.

Date the plan was adopted/accepted: _____ (1 point)

Documentation Required:

- Three copies of the park master plan or greenway system plan.
- Three copies of the local governing board's meeting minutes or resolution as documentation of the adoption or acceptance.
- List the page number(s) and tab or highlight where the project is referenced in the plan.

2. Comprehensive systemwide parks and recreation plan for the local government's jurisdiction (7 points)

- a. ☐ The applicant has a Comprehensive Systemwide Parks and Recreation Plan produced or revised in the past 10 years and the project conforms to the plan.

Date the plan was produced: _____ (6 points)

- b. ☐ The local governing board has adopted the systemwide plan.

Date the plan was adopted/accepted: _____ (1 point)

Documentation Required:

- Three copies of the comprehensive systemwide parks and recreation plan.
- Three copies of the local governing board's meeting minutes or resolution as documentation of the official adoption or acceptance.
- List the page number(s) and tab or highlight where the project is referenced in the plan.

3. 3-5 year capital improvement plan for parks and recreation (3 points)

- ☐ The applicant has a 3-5 year parks and recreation plan or a capital improvements plan for parks and recreation and the project is identified in the plan.

Date the plan was adopted/accepted: _____ (3 points)

Documentation Required:

- Three copies of the capital improvement plan.
- Three copies of the local governing board's meeting minutes or resolution as documentation of their adoption or acceptance as a part of the local government's budget process.
- List the page number(s) and tab or highlight where the project is referenced in the plan.

B. Level of public involvement in developing and supporting the project: (15 possible points)

1. Public meetings (5 points):

- ☐ The applicant conducted a public meeting(s) exclusively for discussing the project and obtaining comments. The public supported the project.

Date of the meeting(s): _____

Documentation Required:

- Provide a title page that gives the name of applicant, the name of the project and identifies the document as "Public Meetings."
- Three copies of the newspaper advertisement or a document describing the other means used to widely advertise the meeting.
- Three copies of the minutes, including the discussion of the project, who was present and public comments.

2. Recreational needs survey (5 points):

- ☐ The results of a survey to determine the recreational needs in the applicant's jurisdiction show that the citizens support the project. The survey was conducted during the past ten years.

Documentation Required:

- A title page that gives the name of applicant, the name of the project and identifies the document as "Survey of Recreational Needs."
- Questionnaire
- Results of the survey
- Describe how the survey was distributed. Give the date(s) of distribution and the number of surveys distributed. Include a description of the respondents to insure that there are enough and that they are representative of the population in the local government's jurisdiction.
- Describe how the results of the survey show that the citizens support the project.

3. Support from civic (non-governmental) groups (3 points):

- ☐ The applicant presented the project to two or more local groups (Example: civic groups, neighborhood associations,

youth organizations, advisory boards, etc.) and received support for the project.

Documentation Required:

- Include a title page that gives the applicant's name, the project's name and identifies the document as "Presentations to Local Groups."
- Three (3) copies of the agenda, minutes or other documentation from the groups that confirm the dates of the meetings and the presentations given by the applicant.
- *Note: support letters do not count as presentations.*

Name of the Organization	Date of the Presentation	Meeting agenda or letter from the organization included in the application?

4. Support from a parks and recreation board (2 points):

- ☐ The applicant presented the project to the parks and recreation advisory board or a similarly appointed group and received a motion of support for the project.

Date of the meeting(s): _____

Documentation Required:

- Include a title page that gives the name of the applicant, the project and identifies the document as "Presentation to Advisory Board."
- Three copies of the minutes from the meeting that include support for the project.

C. Public recreational facilities provided by the project: (55 possible points)
(Does not apply for applications proposing land acquisition only.)

1. The local government will be building its first public park on property that it owns. (20 points)

☐ Yes ☐ No

Explain:

2. New, like or renovated facilities to be provided: (Maximum 30 points for the sum of 2a, 2b and 2c.)

a. The project will provide (check one):

- ☐ 3 or more types of new recreational facilities (20 points)
- ☐ 2 types of new recreational facilities (15 points)
- ☐ 1 type of new recreational facility (10 points)

List the new types of recreational facilities:

b. The project will add recreational facilities at the park that are like the facilities that exist at the park. The project will add (check one):

- ☐ 3 or more types of recreational facilities (12 points)
- ☐ 2 types of recreational facilities (8 points)
- ☐ 1 type of recreational facility (4 points)

List the types of recreational facilities:

c. The project will provide major renovation of (check one):

- ☐ 3 or more types of recreational facilities (8 points)
- ☐ 2 types of recreational facilities (6 points)
- ☐ 1 type of recreational facility (4 points)

List the recreational facilities to be renovated and why each renovation is needed:

3. The project will provide a trail or greenway (1/4 mile or longer) that links to existing recreation area(s), school(s), downtown businesses, and/or communities located outside of the park. (5 points)

☐ Yes ☐ No

Site plan must show trail linkage. Also, please identify by name and location the existing trail and areas to be linked by the proposed trail:

D. The suitability of the site for the proposed project. (5 possible points)

1. ☐ The site is suited for the proposed development with minimal adverse impact to the environment. (1 point)
2. ☐ The location of the site enhances the park and the public's access to the park. Describe how the location of the site will enhance the park and the public's access to the park. (1 point)
3. ☐ The site is enhanced by the adjacent property uses. Describe the uses of the adjacent property and how they will enhance the park. (1 point)
4. ☐ The proposed site is large enough to adequately accommodate the proposed development. The proposed project will require minimal site preparation considering the geographic region where it is located. (1 point)
5. ☐ The site is free of restrictive easements, overhead power lines, or other intrusions that would limit the proposed development or cause a safety hazard for users. (1 point)

To be awarded these points, the applicant must adequately describe why the proposed project meets each of the five criteria. For land acquisition only projects, base comments on the proposed plan for developing the site after completing the LWCF project.

E. The applicant's commitment to operating and maintaining the project. (15 possible points)

1. ☐ The applicant has a full-time parks and recreation department that will manage the project site to provide programming and to ensure adequate operation and maintenance. (15 points)
2. ☐ The applicant has a full-time staff, such as a public works, who will manage the project site to ensure adequate operation and maintenance. (8 points)
3. ☐ The applicant will manage the project site with part-time staff or by contractual agreement to ensure adequate operation and maintenance. (4 points)
4. ☐ An organized volunteer group, such as a civic group or youth sports association will operate and maintain the site. (2 points)

Provide the name of the organization that will operate and maintain the site:

If the applicant is not going to operate the site with full-time staff, (see # 3 & #4), describe how and when the site will be open to the general public.

F. Land acquisition (15 possible points)

1. ☐ If not purchased at this time, a significant natural, cultural, recreational, scenic or highly-threatened resource will be used for other purposes. (15 points)
2. ☐ The site is an excellent natural and/or recreational resource. (10 points)
3. ☐ The site is an average natural and/or recreational resource. (5 points)

Describe in detail why the site's resources should receive 5, 10, or 15 points:

Not applicable for projects proposing facility development only.

G. Clientele served and accessibility (5 possible points)

1. ☐ Proposed project is designed primarily for use by persons with disabilities. (3 points)
2. ☐ Proposed project will renovate existing facility(s) to make them accessible to persons with disabilities. (2 points)

Not applicable for projects proposing land acquisition only.

H. Previous LWCF funding (10 possible points – refer to per capita funding ranking on page E - 20)

1. Level of local LWCF funding per capita by county (10 possible points)

County rank (from high to low) per capita LWCF funding	Points Awarded
1 - 10	1
11 - 20	2
21-30	3
31-40	4
41-50	5
51-60	6
61-70	7
71-80	8
81-90	9
91 – 100	10

I. Consistency with SCORP priorities – Geographic distribution, public preferences for recreation activities, contribution to SCORP goals and objectives, and recreation facility needs identified by recreation managers. (50 possible points)

1. ☐ Geographic distribution – Refer to the list of counties ranked by current supply of outdoor recreation resources on page E – 21 & 22 (15 points)

County rank (from high to low) based on residents per facility or local park acres	Points Awarded
1 - 10	1.5
11 - 20	3
21-30	4.5
31-40	6
41-50 (or facility not listed)	7.5
51-60	9
61-70	10.5
71-80	12
81-90	13.5
91 – 100	15

Facility groups:

Athletic fields include baseball, softball, football, soccer, and multi-purpose fields.

Athletic courts include basketball courts, tennis courts, and volleyball courts.

Trail miles include all types of trails.

For acquisition projects, refer to the local park acreage listing.

Applications proposing several types of facilities with different points awarded will be averaged.

2. ☐ Public preferences - Comparing LWCF Applications based on the public preferences for recreation. See the list of recreational activities ranked by public participation on page E - 23. (15 points)

Activity rank (from high to low) based on percentage of the public participating	Points Awarded
Highest ranked group	15
2 nd ranked group	13.5
3 rd ranked group	12
4 th ranked group	10.5
5 th group (or activity not listed)	9
6 th group	7.5
7 th group	6
8 th group	4.5
9 th group	3
10 th group	1.5

Applications proposing several types of activities with different points awarded will be averaged.

Not applicable for projects proposing land acquisition only.

3. Contribution to SCORP goals, objectives and initiatives (5 points)

Number of Objectives Addressed	Points Awarded
Five or Six	5
Four	4
Three	3
Two	2
One	1

Objective # 1: Meet the needs of North Carolina's rapidly growing population by maintaining and enhancing its outdoor recreation resources;

Objective # 2: Support improvements in public health and fitness by increasing opportunities for physical activity;

Objective # 3: Improve the visibility of and public access to public recreation areas and foster cooperation between public recreation managers;

Objective # 4: Promote the economic advantages of the state's recreation opportunities for communities across North Carolina;

Objective # 5: Promote and conserve North Carolina's vast and high quality natural resources and landscapes;

Objective # 6: Increase public awareness of the state's natural resources and outdoor recreation opportunities, to include the significance of conservation, through interpretation, education and outreach.

4. ☐ Recreation facility needs identified by recreation managers in North Carolina. Refer to the list of recreation facilities ranked as most urgently needed on page E - 24 (15 points)

Recreation facilities and areas ranked (from high to low) based on priorities identified by recreation managers	Points Awarded
Highest ranked group	15
2 nd ranked group	10
3 rd ranked group	5
4 th group (or activity not listed)	2

Applications proposing several types of activities with different points awarded will be averaged.

Not applicable for projects proposing land acquisition only.

J. Other positive or negative factors: (+ 12 or – 12 possible points)

1. Positive Features (+ 12 points possible)

- a. ☐ Application is a joint project between two or more units of government or the project is identified in a multi-jurisdictional parks and recreation plan adopted by the applicant(s). (+3 points)
- b. ☐ Application is for an interconnected trail that links to an existing recreation area(s), school(s), businesses and/or communities located outside of the project site. (+2 points)
- c. ☐ Project proposes new recreational facility to provide public access to public waters (such as river, ocean, sound, or lake). (+2 points)
- d. ☐ Applicant has: developed quality outdoor recreation facilities and they are well maintained for public use.
or
Applicant has satisfactorily completed and complied with grant compliance guidelines on previous LWCF and/or PARTF projects. (+ 5 points)

2. Negative Feature(s) (- 12 points possible)

- a. ☐ Applicant has an active LWCF or PARTF grant (- 2 points)
- b. ☐ Poor application documentation (poor maps/site plan, instructions not followed, missing documentation, unrealistic budget, inconsistencies, etc.) (-3 points)
- c. ☐ Over half of the project's cost is for site preparation and/or support facilities (such as restrooms, roads, utilities, dredging, landscaping, etc.) (-2 points)
- d. ☐ Applicant has history of poor quality and/or substandard maintenance and operation of their outdoor recreation facilities.
or
Below average compliance with grant guidelines and/or currently has an outstanding compliance problem with an existing or previous project. (-5 points)

Definitions Section

1. **Recreational Facility:** The following list provides examples of projects that will qualify as new types of recreational facilities or areas.

- A. **Examples of Recreational Facilities and Areas:**

- Sports facilities including tennis courts, soccer fields, ballfields, running tracks, volleyball courts and basketball courts.
- Swimming facilities including swimming pools, spraygrounds, wave-making pools, wading pools, and swim beaches.
- Trails within a park with a minimum continuous length of 1/4 mile including nature trails, hiking trails, bicycling trails, parcours, and equestrian trails.
- Greenways - linear open spaces connecting parks or other public areas that are 1/4 mile or longer and usually contain a multi-purpose trail.
- Camping facilities including cabins, group camps, and tent and trailer campgrounds.
- Picnic facilities including picnic shelters with tables and grills, or picnic areas with groups of tables, grills and trash receptacles.
- Interpretive facilities for nature study, viewing scenery and photography including observation decks, viewing platforms, boardwalks. May also include benches and interpretive signs.
- Playgrounds (for children ages 6-12) and tot lots (for children ages 2-5).
- Amphitheaters.
- Fishing and boating facilities including man-made lakes or ponds, docks, launching ramps, piers, and marinas.
- Large designated open areas with landscaping, benches, and walkways intended for recreational activities such as sunbathing, relaxing with family and friends, informal picnics and games.

- B. **Support facilities** are **not** recreational facilities: Support facilities include parking lots, roads, lighting, bleachers, restrooms, concession buildings, fencing, landscaping, site preparation, bridges, utilities, sidewalks, stairways, drinking fountains, and maintenance buildings. Recreational programs, such as sports activities, classes or lessons, are not facilities.

2. **Renovation:** The extensive reconstruction of a facility to restore or improve its usefulness to its original purpose. A renovation project will not be awarded points under the scoring system if the facility's deterioration is due to inadequate maintenance during its reasonable lifetime. Renovating a recreational or non-recreational facility for a new recreation use would apply to new and/or like recreational facilities.

3. Master Plan for the Park or Greenway System

Master Plan for the Park: A long-range plan for one park that contains a site analysis; a description of the community's recreational needs; property acquisition boundaries; and the proposed location of all capital improvements. A master plan document must adequately address all of the following items:

- Site analysis - Describe and evaluate the site's natural, historic, and man-made features. These include items such as topography, soils, vegetation, hydrology, significant natural communities, wetlands, existing structures, and public access.
- Recreational needs - Identify the recreational opportunities that the public prefers using meetings or a survey. Describe how the recreational opportunities being proposed by the master plan relate to existing recreational facilities and services in the jurisdiction (this may be a part of the system-wide comprehensive plan).
- Program description - Identify the main purposes of the park including a description of the how the local government will design the park to be used by the public.
- Physical needs - Identify the physical needs of the park's site. Include any land the local government will acquire and any capital improvements (buildings, recreation facilities, roads, utilities). All land and capital improvements proposed in the PARTF application must be included in the master plan.
- Project costs for property acquisition and capital improvements, divided into phases if necessary. The cost information can be provided in a separate document that is submitted with the master plan.
- Site plans and illustrations depicting the boundaries of land to be acquired and the location of facilities.
- Public Involvement - Describe how the local government involved a broad range of the citizens in its jurisdiction as the master plan was being developed. Examples include public meetings or advisory committee meetings. This description can also be provided in a separate document that is submitted with the master plan.

Greenway System Plan - A long-range plan to develop a framework for building an integrated system of trails that will link citizens to the outdoors. A greenway system plan must adequately address all the following items:

- Vision, Goals and Objectives - The goals and objectives the local government would like the plan to accomplish related to the different uses/benefits of the greenway, especially in reference to recreation/fitness/health.
- Inventory Existing Data and Related Plans – the identification and mapping of existing natural resources, man-made features and linear greenway corridors within the local jurisdiction that might influence the development of the greenway system.
- Analyze Data and Develop/Map Proposed Greenway – review and analysis of all data collected to allow the local government to:
 - Identify potential greenway corridors,
 - Identify hubs/destinations that are either natural resource based or man-made (or a combination of the two) which should be part of the greenway system,
 - Identify important and threatened open space that should be part of the greenway system including ecologically or biologically significant areas or hubs,
 - Identify and discuss greenway development challenges such as floodways, active railroad tracks/crossings, major roadway crossings, etc.
- Mapping - the result of the above analysis is a map(s) and text to describe the proposed system. The map(s) should illustrate not only existing greenway system elements, but also the proposed greenway network envisioned by the local government.
- Action Plan – develop a specific action plan that will position the local government to move forward in realizing the proposed greenway system. The action plan should include:
 - A listing of action steps that set priorities,
 - Roles and responsibilities in implementing the plan,
 - Cost estimates, resources and potential funding options needed to address action steps, and

- Greenway corridor segments identified as potential pilot projects.
- Public Involvement - A description of how the local government involved a broad range and representative number of its citizens as the greenway plan was prepared. Examples include a random survey of the citizens; a series of public meetings that would give most citizens an opportunity to participate; a series of focus group meetings that involve the representatives of the jurisdiction's population; or a combination of these efforts. Please address the number of people who participated and who they represented for each level of public involvement used.
 - Maintenance, Management and Operational Policies – address policies that will provide the basis for making decisions related to trail maintenance, management and security.
 - The cost information and description of public involvement can be provided in a separate document that is submitted with the greenway plan.
4. **Comprehensive Systemwide Plan for Parks and Recreation:** A long-term plan that describes how a local government will address the recreational needs of the citizens in its jurisdiction. A systemwide plan document must adequately address all of the following items:
- Produced or revised within the past ten years.
 - A description of the jurisdiction's residents and their preferences for recreational activities and facilities.
 - An evaluation of existing recreational facilities and park land such as local and state parks, school facilities, the Y, churches, private sector, etc. to determine if the community's current and future recreational needs are being met.
 - An estimate of the park land to be acquired and the recreational facilities to be developed to address shortfalls in current services.
 - A detailed description of how the local government involved a broad range and representative number of its citizens as the plan was prepared.
 - Examples include a random survey of the citizens; a series of public meetings that would give most citizens an opportunity to participate; a series of focus group meetings that involve the representatives of the jurisdiction's population; or a combination of these efforts.
 - This description may be provided in a separate document if it is not included in the plan. Please address the number of people who participated and who they represented.
5. **Capital Improvement Plan / Three-to-Five Year Park and Recreation Plan:** A plan that lists all of the capital expenditures, and / or specifically all park and recreation projects, that a local government has approved for funding and scheduled for the near future. The plan is a component of the local government's regular budget cycle.
6. **Survey of Recreational Needs:** A survey of the citizens in the local government's jurisdiction to identify their needs and preferences for recreational opportunities. The local government can use the survey as one of the first steps in developing a master plan for a specific park or a system wide comprehensive park and recreation plan for the entire jurisdiction. Through the survey, citizens can give their preferences for different *types of* recreation and facilities. The local government uses the survey's results to establish recreational priorities for the jurisdiction.

The local government must distribute the questionnaire to a broad and representative sample of its citizens. The questionnaire can be distributed through the mail, door-to-door, person-to-person, by telephone, in focus groups and in public meetings.

The following key elements of the survey must be documented:

1. The survey should be distributed to a sample of citizens that is sufficiently large and varied enough to be representative of the population in the jurisdiction. A random sample of the population is preferred.
2. The number of respondents should be sufficiently large enough to adequately represent the population of the jurisdiction.
3. The questions must be clear and unbiased.

4. The questions should not limit the citizens to choosing from a narrow list of recreational opportunities.
5. Copies of the same questionnaire must be distributed to everyone in the sample.
6. The results should include some demographics of the respondents to ensure that they are representative of the population in the jurisdiction.
7. The survey must have been conducted within the past ten years.
8. The survey must be conducted and results received before the local government begins planning the PARTF project.

Table for Item H - Level of Local LWCF Spending Per Capita by County

Rank	County	LWCF Assistance	2015 Population	LWCF per Capita	Rank	County	LWCF Assistance	2015 Population	LWCF per Capita
33	Alamance	1,103,154	154,511	\$ 7.14	71	Johnston	613,254	182,547	\$ 3.36
26	Alexander	313,223	37,268	\$ 8.40	93	Jones	13,508	10,439	\$ 1.29

Project Evaluation Criteria for State Government

State of North Carolina

Department of Environment and Natural Resources

February 2015

Scoring Summary

	Points Awarded by Type of Project		
Category	Acquiring Land	Developing Recreation Facilities	Both Land and Facilities
Planning	20	20	20
Public Involvement	7	7	7
Recreation Facilities	0	55	55
Site Considerations	5	5	5
Operation and Maintenance	15	15	15
Land Acquisition	15	0	15
Clientele Served	0	5	5
Consistency with the NC Outdoor Recreation Plan	35	35	35
Total Possible Points	97	142	157
Bonus: plus or minus 12 points for projects involving factors including partnerships, interconnected trail networks, access to public waters, as well as the quality of previous projects			

LWCF Scoring System for State Government

Please provide all of the information requested for each item. Attach a separate page if more space is needed to address any item. Before beginning, please refer to the Definitions Section. A team of LWCF staff and regional consultants will evaluate each application based on the scoring system and make the final decision about the applicant's score.

Applicant:
Project:

A. Planning: (20 possible points)

3. Master Plan for the park and/or greenway system (10 points)

- a. ☐ The applicant has a master plan or other formal planning document created or revised within the past five years for the project site and the project conforms to the plan. (9 points)

Date the plan was approved/accepted: _____ (1 point)

or

- b. ☐ The applicant has a master plan or other formal planning document created or revised within the past six years to ten years for the project site and the project conforms to the plan. (4 points)

Date the plan was approved/accepted: _____ (1 point)

- c. ☐ The applicant has a conceptual plan for this project.

Date the plan was produced: _____ (1 point)

Documentation Required:

- A copy of the plan that shows this project.

4. State parks systemwide parks and recreation plan (7 points)

- ☐ The applicant has a Comprehensive Systemwide Parks and Recreation Plan produced or revised in the past 10 years and the project conforms to the plan. (6 points)

Date the plan was approved/accepted: _____ (1 point)

Documentation Required:

- A copy or web reference for the comprehensive systemwide parks and recreation plan.
- List the page number(s) and tab or highlight where the project is referenced in the plan.

4. 3-5 year capital improvement plan for parks and recreation (3 points)

- ☐ The applicant a capital improvements and/or land acquisition plan for parks and recreation and the project is identified in the plan.

Date the plan was approved/accepted: _____ (3 points)

Documentation Required:

- A copy of the capital improvement and/or land acquisition plan.

- List the page number(s) and tab or highlight where the project is referenced in the plan.

B. Level of public involvement in developing and supporting the project: (7 possible points)

1. Public meetings (5 points):

- ☐ The applicant conducted a public meeting(s) exclusively for discussing the project and obtaining comments. The public supported the project.

Date of the meeting(s): _____

Documentation Required:

- Provide a title page that gives the name of applicant, the name of the project and identifies the document as "Public Meetings."

2. Support from a parks and recreation board (2 points):

- ☐ The applicant presented the project to the parks and recreation advisory board or a similarly appointed group and received a motion of support for the project.

Date of the meeting(s): _____

Documentation Required:

- Include a title page that gives the name of the applicant, the project and identifies the document as "Presentation to Advisory Board."
- A copy of the minutes from the meeting that include support for the project.

**C. Public recreational facilities provided by the project: (55 possible points)
(Does not apply for applications proposing land acquisition only.)**

4. The state agency will be building the first public facilities at this site. (20 points)

- ☐ Yes ☐ No

Explain:

5. New, like or renovated facilities to be provided: (Maximum 30 points for the sum of 2a, 2b and 2c.)

- a. The project will provide (check one):
- ☐ 3 or more types of new recreational facilities (20 points)
 - ☐ 2 types of new recreational facilities (15 points)
 - ☐ 1 type of new recreational facility (10 points)

List the new types of recreational facilities:

- b. The project will add recreational facilities at the park that are like the facilities that exist at the park. The project will add (check one):
- ☐ 3 or more types of recreational facilities (12 points)
 - ☐ 2 types of recreational facilities (8 points)
 - ☐ 1 type of recreational facility (4 points)

List the types of recreational facilities:

- c. The project will provide major renovation of (check one):
- ☐ 3 or more types of recreational facilities (8 points)
 - ☐ 2 types of recreational facilities (6 points)
 - ☐ 1 type of recreational facility (4 points)

List the recreational facilities to be renovated and why each renovation is needed:

6. The project will provide a trail or greenway (1/4 mile or longer) that links to existing recreation area(s), natural area(s), and/or communities. (5 points)

☐ Yes ☐ No

Site plan must show trail linkage. Also, please identify by name and location the existing trail and areas to be linked by the proposed trail:

D. The suitability of the site for the proposed project. (5 possible points)

6. ☐ The site is suited for the proposed development with minimal adverse impact to the environment. (1 point)
7. ☐ The location of the site enhances the park and the public's access to the park. Describe how the location of the site will enhance the park and the public's access to the park. (1 point)
8. ☐ The site is enhanced by the adjacent property uses. Describe the uses of the adjacent property and how they will enhance the park. (1 point)
9. ☐ The proposed site is large enough to adequately accommodate the proposed development. The proposed project will require minimal site preparation considering the geographic region where it is located. (1 point)
10. ☐ The site is free of restrictive easements, overhead power lines, or other intrusions that would limit the proposed development or cause a safety hazard for users. (1 point)

To be awarded these points, the applicant must adequately describe why the proposed project meets each of the five criteria. For land acquisition only projects, base comments on the proposed plan for developing the site after completing the LWCF project.

E. The applicant's commitment to operating and maintaining the project. (15 possible points)

1. ☐ The applicant has sufficient staff and/or resources to manage the site long term. (15 points)
2. ☐ The applicant has a moderate amount of staff and/or resources to manage the site long term. (8 points)
3. ☐ The applicant has minimal staff and/or resources to manage the site long term. (4 points)
4. ☐ An organized volunteer group, such as a civic group or non-profit land trust will operate and maintain the site. (2 points)

Provide the name of the organization that will operate and maintain the site:

Describe how and when the site will be open to the general public.

F. Land acquisition (15 possible points)

1. ☐ If not purchased at this time, a significant natural, cultural, recreational, scenic or highly-threatened resource will be used for other purposes. (15 points)
2. ☐ The site is an excellent natural and/or recreational resource. (10 points)
3. ☐ The site is an average natural and/or recreational resource. (5 points)

Describe in detail why the site's resources should receive 5, 10, or 15 points:

Not applicable for projects proposing facility development only.

G. Clientele served and accessibility (5 possible points)

3. ☐ Proposed project is designed primarily for use by persons with disabilities. (3 points)
4. ☐ Proposed project will renovate existing facility(s) to make them accessible to persons with disabilities. (2 points)

Not applicable for projects proposing land acquisition only.

H. Consistency with SCORP priorities – Contribution to SCORP goals and objectives, public preferences for recreation activities, and recreation facility needs identified by recreation managers. (35 possible points)

5. ☐ Contribution to SCORP goals, objectives and initiatives (5 points)

Number of Objectives Addressed	Points Awarded
Five or Six	5
Four	4
Three	3
Two	2
One	1

Objective # 1: Meet the needs of North Carolina's rapidly growing population by maintaining and enhancing its outdoor recreation resources;

Objective # 2: Support improvements in public health and fitness by increasing opportunities for physical activity;

Objective # 3: Improve the visibility of and public access to public recreation areas and foster cooperation between public recreation managers;

Objective # 4: Promote the economic advantages of the state's recreation opportunities for communities across North Carolina;

Objective # 5: Promote and conserve North Carolina's vast and high quality natural resources and landscapes;

Objective # 6: Increase public awareness of the state's natural resources and outdoor recreation opportunities, to include the significance of conservation, through interpretation, education and outreach.

6. ☐ Public preferences - Comparing LWCF Applications based on the public preferences for recreation. See the list of recreational activities ranked by public participation on page E - 33. (15 points)

Activity rank (from high to low) based on percentage of the public participating	Points Awarded
Highest ranked group	15
2 nd ranked group	13.5
3 rd ranked group	12
4 th ranked group	10.5
5 th group (or activity not listed)	9
6 th group	7.5
7 th group	6
8 th group	4.5
9 th group	3
10 th group	1.5

Applications proposing several types of activities with different points awarded will be averaged. For projects proposing only land acquisition, use only if land base for the recreational use is suitable.

7. ☐ Recreation facility needs identified by recreation managers in North Carolina. Refer to the list of recreation facilities ranked as most urgently needed on page E - 34. (15 points)

Recreation facilities and areas ranked (from high to low) based on priorities identified by recreation managers	Points Awarded
Highest ranked group	15
2 nd ranked group	10
3 rd ranked group	5
4 th group (or activity not listed)	2

Applications proposing several types of activities with different points awarded will be averaged.

For projects proposing only land acquisition, use only if land base for the recreational use is suitable.

I. Other positive or negative factors: (+ 12 or – 12 possible points)

3. Positive Features (+ 12 points possible)
- a. ☐ Application is a joint project between two or more units of government or the project is identified in a multi-jurisdictional parks and recreation plan adopted by the applicant(s). (+3 points)
 - b. ☐ Application is for an interconnected trail that links to an existing recreation area(s), school(s), businesses and/or communities located outside of the project site. (+2 points)
 - c. ☐ Project proposes new recreational facility to provide public access to public waters (such as river, ocean, sound, or lake). (+2 points)
 - d. ☐ Applicant has: developed quality outdoor recreation facilities and they are well maintained for public use.
- or
- Applicant has satisfactorily completed and complied with grant compliance guidelines on previous LWCF and/or PARTF projects. (+ 5 points)
4. Negative Feature(s) (- 12 points possible)
- a. ☐ State park unit in the application has an active LWCF grant (- 2 points)
 - b. ☐ Poor application documentation (poor maps/site plan, instructions not followed, missing documentation, unrealistic budget, inconsistencies, etc.) (-3 points)
 - c. ☐ Over half of the project's cost is for site preparation and/or support facilities (such as restrooms, roads, utilities, dredging, landscaping, etc.) (-2 points)
 - d. ☐ Applicant has history of poor quality and/or substandard maintenance and operation of their outdoor recreation facilities.
- or
- Below average compliance with grant guidelines and/or currently has an outstanding compliance problem with an existing or previous project. (-5 points)

Table for Item H.2 – Activities Ranked by Percentage of the Public Participating		
	Percentage Responding	Points Awarded
Visiting a beach or lake	69%	15
Walking for Pleasure or Exercise	61%	
Visiting parks or Historical Sites	60%	
Hiking, Trails	59%	
Fishing - Freshwater, bank or pier	58%	
Viewing scenery	52%	
Fishing - Freshwater, boat	50%
